Tone Analysis    Tips & Feedback

- ✓ You acknowledged the audience and engaged with them, creating a friendly and reliable atmosphere.
- ✓ You used questions to engage the audience and encourage them to think critically about the topic.
- ✓ You acknowledged the challenges the user faces and highlighted how the product can help maximize resources and achieve goals effectively.
- ✗ The transitions between topics were not clear, making it challenging to follow the flow of the presentation. Adding clear transitions would improve the overall structure and coherence.
- ✗ The presentation lacked specific examples or evidence to support the claims you made about the product's effectiveness. Providing concrete examples would make the presentation more convincing.

### Enable learners to show what they know

With learners recording themselves on video they can apply the knowledge of your training program. Unlike multiple choice exams, video responses ensure a verified and validated demonstration of expertise.

### Drive experiential learning

Scenario-based questions answered by video drive deeper comprehension, critical thinking and retention of learning.

### Provide unmatched accuracy

When learners record themselves on video it provides an authentic evaluation of their abilities.

### Scale your training program for maximum revenue impact

Educate, train and certify an unlimited number of learners with personalized AI and instructor feedback to drive brand loyalty and word-of-mouth referrals.

### Supply a judgement-free practice space

Learners no longer have to worry about instructors making judgments on their mistakes. They can now confidently engage in repeated practice and get immediate feedback to improve on their own time.

INTREPID'S AI VIDEO ASSESSMENTS

# What others are saying about this L&D video AI tool...

I took all my multiple choice exams and moved them to Intrepid's AI Video Assessments powered by Bongo. The feedback I got from the GTM reps was that they realized how much they'd forgotten. With Intrepid, they were encouraged to go back through their training and notes. They liked that they could do several recordings and pick their best.

– DIGITAL ACCESSIBILITY PLATFORM PROVIDER

We've had experience using Intrepid powered by Bongo for our expert certification program at ServiceNow. We use it for both group and individual assessments against comprehensive case studies with peer reviews with rubrics. It's truly a game changer.

– SHELLIE GRIEVE

We are certifying people faster and more efficiently. A year ago, they were taking up to 3 days to get certified. Recently I was told an entire class was certified on the first day. They aren't making as many errors and I know Intrepid's AI video is a major reason for that.
